

Bradley Rosvall

Rothelay, New Brunswick | +1 5066470352 | rosvall.bradley@gmail.com

EDUCATION

Information Technology: Software Development (Honours)

2024 - 2026

New Brunswick Community College — Saint John

High School Diploma (French Immersion)

Kennebecasis Valley High School — Quispamsis

WORK EXPERIENCE

NBCC College Office of Research Enterprise

Saint John

Paid Student Practicum

- Designed and developed a responsive web dashboard using HTML, CSS, JavaScript, and Bootstrap.
- Collaborated with a teammate to integrate live sensor data into the web dashboard using Git for collaborative software development.
- Implemented claims-based authentication using object-oriented programming principles with C#.

Atlantic Coastal Action Program

Saint John

Volunteer Tree Planter

- Accurately followed planting procedures
- Communicated with team members to achieve proper spacing between trees

Irving Atlantic Wallboard

Saint John

Tarper (Summer Position)

- Packaged wallboard onto train cars in accordance with safety guidelines
- Maintained attention to detail to prevent damaged packaging

SKILLS

Object-Oriented Programming with C#, Web Page Design using HTML, CSS, JavaScript, and Bootstrap, Database Design and Implementation using MySQL, Structured Problem Solving, Copilot and Claude Assisted Development, Git, GitHub

PROJECTS

Greenhouse Project (ASP.NET)

April 2026 — June 2026

ASP.NET Core MVC (.NET 8.0)

- Designed and built a web dashboard to display and control live greenhouse data
- Integrated real-time MQTT data and historical InfluxDB time-series data into interactive Plotly.js widgets for monitoring greenhouse conditions
- Implemented claims-based authentication and role-based access control to manage admin and guest permissions
- Designed a flexible widget system for gauges, line charts, and tables, driven by JSON configuration strings stored in MySQL
- Built an edit / display mode control panel allowing admin users to update actuator settings

Tournament Registration and Management System

November 2025 — December 2025

ASP.NET Core MVC (.NET 8.0)

- Built a web application that allows users to create, update, and delete tournament teams through SQL-backed CRUD operations
- Designed and implemented SQL-backed CRUD operations
- Integrated user input validation to improve application security
- Designed and implemented a clean, user-friendly interface using Bootstrap, CSS, and HTML
